

- ☒ Comments explaining each loop of code
- ☐ There's no code duplication
- ☒ Check if variable names make sense
- ☒ Check to see if there test match there clue layout
- ☒ Check for cleaner code. For example,

```
{ showList && <productList /> }
```

to

```
if (showList) {  
    let return = <productList />;  
}
```

A206 Notes

- Not too many comments before each file
- For coding format standards there should be small paragraph at the top of every file explaining the code
- Gets the point of both the error messages, however might only need one in `BadConfigFormatException`
- Labels for variables makes sense
- Comments in test look good
- Clue layout matches test
- Possible legend for clue layout
